Kolkata, West Bengal, India

About Me

B.Tech student in Computer Science and Engineering at KIIT, skilled in web design and full stack development using HTML5, CSS3, Bootstrap, JavaScript, jQuery, Node.js, Express.js, and PostgreSQL. Completed an internship at AMRA Laboratory, Jadavpur University. Aspiring to integrate web development with machine learning as an established full stack developer.

Experience

AMRA Laboratory, Jadavpur University, Kolkata
Development Intern

During my internship at Advanced Materials Research and Application (AMRA) Laboratory, Jadavpur University, Kolkata, in June-July 2024, I developed a responsive and comprehensive webpage to showcase their research projects, publications, and patents. This webpage also served as a medium for connecting with the people involved in the laboratory. This project enhanced my skills in web development and provided valuable experience in creating user-friendly and informative digital platforms.

Projects

Academic Projects

AMRA Laboratory
Webpage

Developed a webpage that provides a visual insight into the research projects of the AMRA Laboratory and showcases the lab's various publications and patents.

Passion Projects

Movie Bucket List
Webpage

A back-end oriented mini-project that focuses on handling various types of HTTP requests and provides an interface for users to keep track of their movie list.

Language

English
Hindi
Bengali

Education

Kalinga Institute of Industrial Technology, Bhubaneshwar

Pursuing B.Tech in Computer Science and Engineering Core

Current CGPA: 8.34

Delhi Public School, Ruby Park, Kolkata

Cleared class 12th (PCM + Computer Science) with 84.8%

Cleared class 10th with 90.4%

Skills

- web design
- web development
- development languages: html, css, javascript, react.js, node.js, express.js, ejs, postgresql
- programming languages: c, java, python
